

TRIP TO ISLAMABAD 15 – 22 SEPTEMBER 2025

Assalamu-Alaikum wr wb to all,

I hope everyone is in good health and is ever ready to meet the challenges we are going to face in trying to successfully launched our programs.

Just wanted to recapped the events during my wonderful stay in Islamabad recently.

Day 1 Monday 15 Sept 2025

Arrived Islamabad Airport at 8 pm Local and met with Brother Aslam and Baber Cheema.

Dinner at Brother Aslam house together with Brother Cheema while having informal discussions

Day 2 Tuesday 16 Sept 2025

Breakfast and proceed with official meeting with Brother Cheema and Brother Aslam.

Brother Hafiz who was supposed to join the meeting unfortunately could not join the meeting due to logistic problem.

We were later joined by Dr Zaib Sarwal and he presented the proposal of the setting up pharmaceuticals business.

After the presentation we were treated home cook meal lunch by Brother Aslam

DAY 3 WEDNESDAY 17 SEPT 2025

After breakfast Brother Musarat Al Hafiz arrived from Faisalabad accompanied by Brother Cheema

We started our meeting in the morning session

Later in the afternoon we were joined by Mr Yang and his friend from Kuwait Finance

Day 4 THURSDAY 18 SEPT 2025

Visits by brother Aslam friends General Munir and another General

DAY 5 FRIDAY 19 SEPT 2025

Performed JUMMA at King Faisal Mosque with brother Cheema

Proceed by lunch hosted by brother Cheema

DAY 6 SATURDAY 20 SEPT 2025

Shopping day with brother Cheema

DAY 7 SUNDAY 21 SEPT 2025

Wrapping up session at brother Aslam house with brother Cheema in attendance

DAY 8 MONDAY 22 SEPT 2025

Departure for Malaysia in the morning.

Brother Cheema drove me to airport.

Arrived KLIA at 2300 Hrs

SALIENT POINTS

1. The visit is to meet the team and to discuss the various projects we planned to undertake;
 - A) Hydro Power Barber Cheema
 - B) Batteries Barber Cheema/Musarat Al Hafiz
 - C) Manufacturing Musarat Al Hafiz
 - D) Pharma Dr Zaib

2. Hydro Power

Brother Cheema explained that the need to manufacture a proto-type of 1 MW in order for us to go for the 50 MW.

Brother Aslam informed that they have started the 30 KW proto-type earlier and requested funding to complete the 30 KW.

On the battery project Brother Cheema explained that he has developed a smart charging system BESS that prolonged the distances by almost triple

He explained that he has written to the Prime Minister of Canada about possibility of setting up the project in Canada and the Canadian Government has allocated 40 million R&D funds for it to be developed in Canada.

It is my wish list actually that I can see the Bus that have been successfully achieved 700 KM as told to me by Brother Aslam before I make the trip but although I didn't get to see it myself, I am confident that Brother Cheema can implement that rather easily. He has share with me the email communication between him and the Canadian Prime Minister.

Brother Musarat Al Hafiz have also started working on the Graphene Batteries as well.

What really excited is that Brother Musarat is able to manufacture all equipment's needed to complete the Hydro project.

I am really looking forwards to visit his facilities in Faisalabad soon.

3. PHARMA

Dr Zaib came to Islamabad from Kashmir to brief his Pharma project and have submitted the proposal to set up manufacturing plant to commercially produced his products.

He actually came back on Sunday to give the sample of his medicines so that I could test it.

THE PLAN FORWARDS

1. Ever since I arrived from Islamabad, I didn't take any rest because of the urgency to get our projects start as soon as possibly can.
2. So, I have been very busy meeting with my team here as well preparing to brief my Board of Directors. They want me to brief them so that we can facilitate the starting of all the projects
3. I have also briefed the person who is liaising with the Prime Minister representative regarding my request of funding to start the projects.
4. Last week I have been requested to prepare for his visit to our facility in order for him to check our progress. He needs to see at least one of our successfully completed projects. He is due to visit us next week.
5. Hence, I have been very busy preparing for his visit as this is part of the process for Government to approve the funding.
6. Since the need to show him is very urgent, we have selected our aerospace project to show him.
7. While I did push for the Board to approve the 30KW prototype, due to constrain of time we decided it is better for us go for 1MW prototype instead, using the funding from the Government.
8. As brother Aslam fully aware, I have R&D company in Penang specializing in Catalyst production where we have been awarded big contract from Ministry of Petroleum Sudan to process their Oil Sludge waste turning it into Green Diesel.
9. We have also got agriculture projects in Sudan and Jizan Saudi.
10. We have presented to the Government requesting funding for all our projects including all that we are doing it right now.
11. We need to implement all our projects to the fullest not by thinking small as I am confident people like Baber Cheema and Musarat Al Hafiz is fully ripe to realise their dream.
12. We have plan to set up manufacturing centres for Brother Musarat to expand his facilities to the fullest.
13. We doing it with the support of the Government of Malaysia, Sudan and Saudi Arabia.
14. We need to be highly professional in our conducts at all time.
15. Within a short time, I have managed to prepare the platform for us to showcased our capabilities.
16. I want our team in Pakistan to get ready to come to Malaysia to brief the Government about our projects.
17. As for the request by brother Aslam for me to brief the team every two days on the progresses made, all I can say is that Yes I would very much like to do it but please also understand that for now my priority is ensure the visit by Prime Minister Rep is a success as we have been lobbying it for quite some time already.
18. As we already a group chat, please forward or share any queries or suggestions and I will immediately respond it as soon as possible.

19. I will now share it with you our facilities where we will start our projects.

20. It is very close to Putrajaya and KLIA

Our multi million facilities is ready for our projects.

THANK YOU
